Completude

jcb

30 mars 2015

Contents

1   Complétude des données

Score de completude = somme des complétudes de chaque item.

Ce chapitre utilise le fichier source("../../Resural/FEDORU/Trame_commune/rapport_2014.R") qui possède deux fonctions pour calculer la complétude et dessiner le diagramme en radar correspondant.

1.1   MAJ

- 12/4/2014: enrgistrement des graphiques, impression du tableau de completude
- 15/4/2015: Ajout légende, amélioration du titre, élargissement du graphique
- 2015-09-21: dernière mise à jour.

1.2   TODO

1.3   Données

Système utilisé: XPS

1.4   Motif de passage

Les motifs de passage ou de recours doivent être codés en CIM10. Certains établissements ne le font pas (Colmar), ce qui entraîne une fausse complétude car le champ n'est pas vide mais inexploitable. La fonction détecte les codes non CIM10 sur la base suivante: a minima un code CIM10 commence par une lettre majuscule suivie de deux chiffres ("[1][0-9][0-9]").
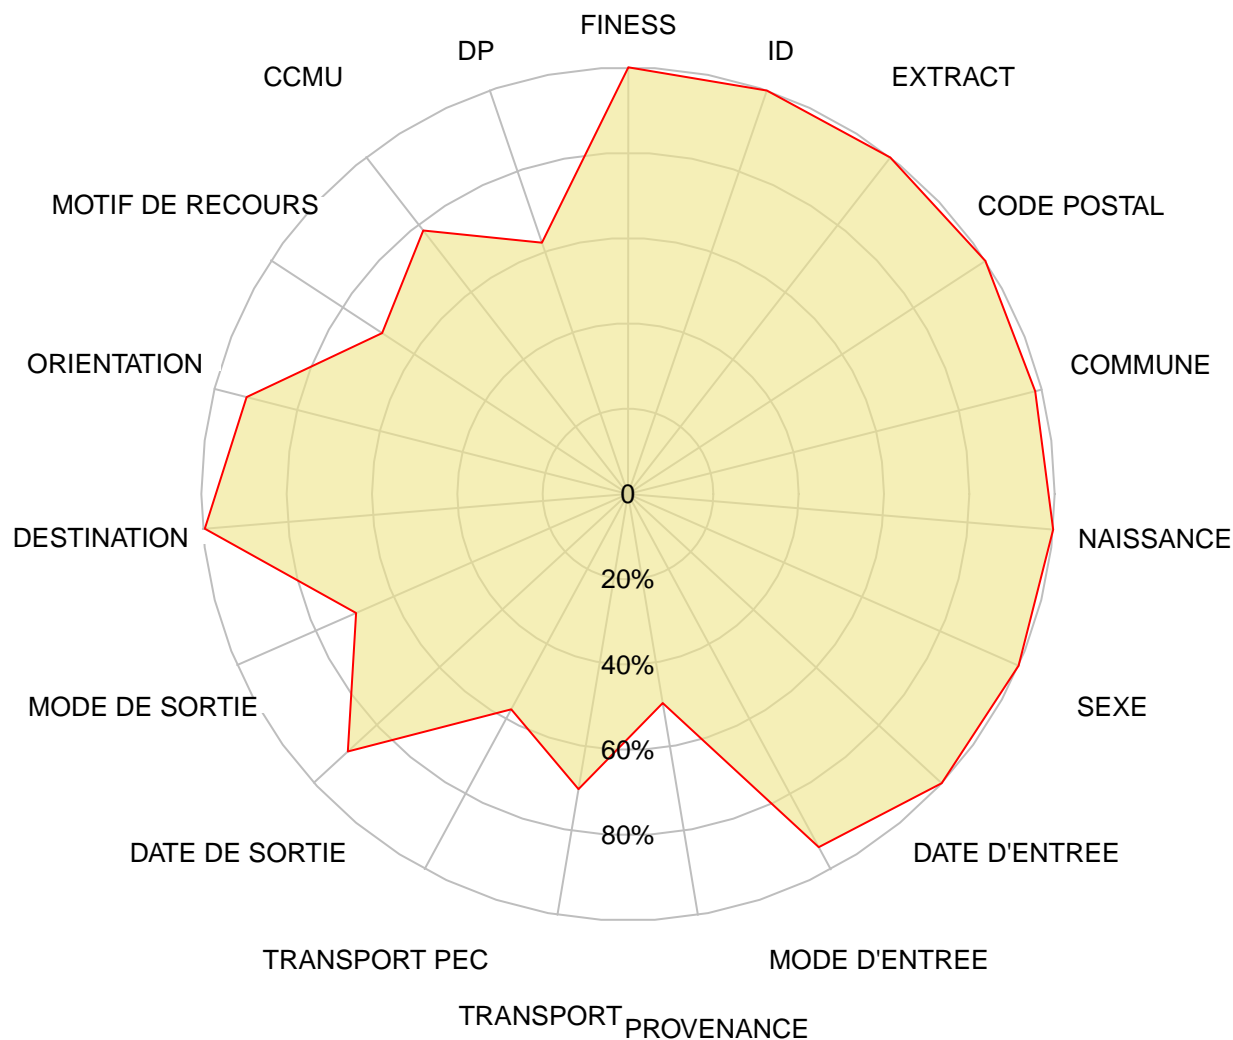

---

1.5 Complétude régionale

C'est la complétude calculée pour tous les RPU quelque soit l'établissement producteur.

Radar de complétude régional (%)

MOTIF DE RECOURS	CCMU	DP	
68.87	78.21	62.26	

Score de complétude régional: 85.77 sur 100.
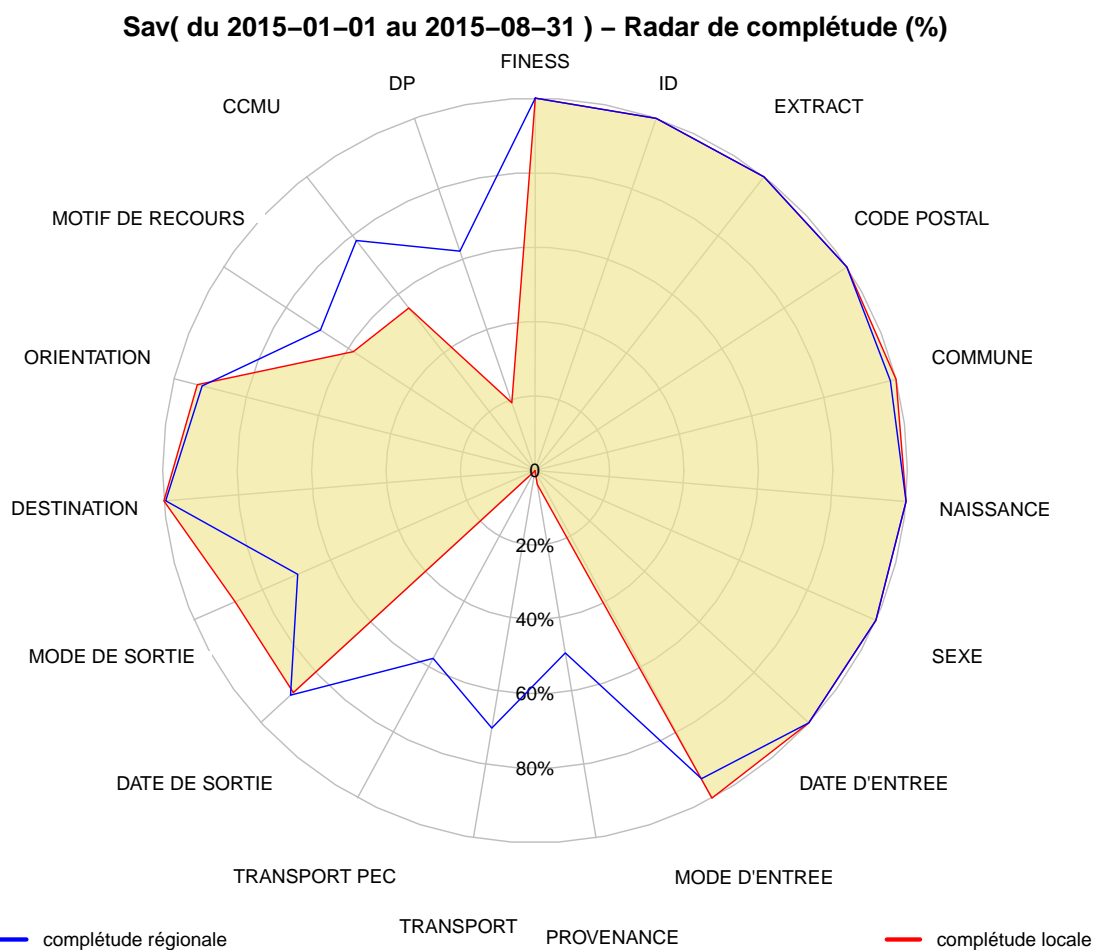

1.6 Completude par établissement

1.6.0.1 Score de completude score = somme des completude de chaque item divisé par le nombre d'items. Varie de 0 à 100.

Todo:

- calculer un sous score par chapitre selon découpage Fedoru
- comparer le score en foction du logiciel utilisé et sa version.
